

HotSpot

Better performance.
More convenience.

Our W-LAN solution for
wireless Internet access.

T-Mobile

Work wherever you want to.

When you've got HotSpot from T-Mobile, wireless surfing on the Internet and accessing your company network is easy and reliable - and your transmission speed is extremely fast.

HotSpot from T-Mobile is based on W-LAN (wireless local area network) technology. It's the public W-LAN solution from T-Mobile. Public W-LAN gives you a (gross) transmission rate of up to 11 Mbit/s in the worldwide popular standard 802.11b. That way you can make best use of your time when waiting at airports, train stations or at one of the HotSpots available in many hotels.

HotSpot from T-Mobile offers you the largest transatlantic W-LAN network in the world. There are over 13,000 locations you can use in Europe and the U.S.

More information is available online at www.t-mobile.de/business/hotspot

Wireless Online.

If you're at a T-Mobile HotSpot (look for the HotSpot logo!), just launch the browser of your W-LAN-capable end device, for example, your laptop or PDA. After entering any Internet address, the HotSpot portal will open automatically in your browser. Then you surf on a local network, the „walled garden.“ You're still not online, so it doesn't cost you anything. To log in to the Internet, you'll need a user name and your personal password.

Use HotSpot Pass as a guest of T-Mobile Germany.

- All you need is your credit card (Mastercard, Visa, American Express).
- You don't need a contract with T-Mobile, T-Online or T-Com.
- Log in to the HotSpot portal, select the number of minutes you want, and pay using your credit card. Please refer to the Internet HotSpot Portal for cost information.
- As long as your voucher is valid, you can log in and off as often as you wish.
- You cannot be reimbursed for unused minutes.
- The HotSpot Pass you buy in Germany is not roaming-capable, so you can't use it when you're in other countries!

This logo means it's a HotSpot from T-Mobile!

HotSpot

Quick Guide

Online in a few easy steps:

1. As soon as you are in a HotSpot designated location, activate W-LAN on your mobile system (e.g. laptop) and start your Internet browser. The browser will automatically open the HotSpot¹ Portal as soon as an Internet address has been keyed in.²
2. The HotSpot Portal offers different methods of logging on to HotSpot:

I.) Not yet a HotSpot customer?

„HotSpot Pass“ is a special offer for none T-Mobile customers and spontaneous HotSpot users.

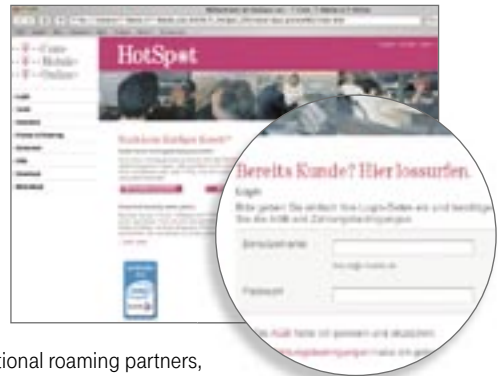

II.) Already a customer?

Then you're ready to surf.

Enter the data provided by T-Mobile or T-Com in the „user name“ and „password“ fields. If you are a T-Online customer, simply enter your e-mail address and password.

III.) Login for Roaming customers

As a W-LAN customer of one of our international roaming partners, you can log in quickly and easily using your usual access data.

Select one of the above methods and experience the flexibility of HotSpot!

¹ HotSpot operated by T-Com and T-Mobile.

² You may need to set the Secure Set Identifier (SSID) to „T-Mobile_T-Com“.

Our HotSpot service staff are available to help you from Monday to Friday, 7 a.m. till 11 p.m., and Saturday and Sunday, 7 a.m. till 10 p.m..

Our BusinessLine staff is there for you by phone around the clock and can gladly help you with any questions.
