Team Description: Telefunken Racoms is a subsidiary of Elbit Systems Ltd which is a leading company in the field of defense systems for Air, Sea and Land platforms

The Elbit Systems group together with it's world wide subsidiaries has developed and introduced a big range of Robotic and Unmanned vehicles

At ELROB 2008 Telefunken Racoms will present 2 of it's Unmanned Ground Vehicles: The Viper and the Guardium.

The VIPER is a dismounted soldier device extending the field of view or performing other tasks that are to dangerous to be done by the soldiers . The VIPER features intuitive operating methodology and intelligent, semi autonomous capabilities.

The Guardium-UGV (G-UGV) system is an autonomous system that provides costumer tailored cost-effective unmanned security solutions for protection of airports, seaports, borders & strategic installations. The G-UGV provides 24/7, all weather, all terrain dynamic patrolling with the ability to integrate into any C⁴ISR Systems.

Sponsors: Company R & D investment

Selection of scenario: (For VIPER only)

1. Reconnaissance and surveillance Indoor and Out door
2. Camp security ____
