Team Description:

AirRobot GmbH & Co. KG is a global playing, mid-sized producer of professional Mini UAV Systems with Headquarter in Arnsberg-Neheim, Germany.

The self-developed high-tech system meets highest quality standards. By intensive exchange of information with our customers the products will be further developed continuously.

Distribution, technical support and after sales services are raised by a widespread network of dealers and sales offices. A team of specialists, located in Arnsberg, are supporting these activities. The business objective is to achieve customer satisfaction.

It is easy to learn how to handle the AirRobot flying platform caused by its self stabilizing electronically position control. So it is possible that the pilot can concentrate only on his mission. Different types of cameras and sensor are available. They are easy to change through a cleverly devised payload system.

Applications of AirRobot are reconnaissance, inspection, surveillance, search and rescue, as well as civil aerial view photography.
