The **Armaments and Defence Technology Agency** (ADTA) is the centre of excellence at the science and engineering-oriented departments like machine constructions, construction engineering, electrical engineering, safety engineering, power engineering and materials engineering as well as the natural scientific department's physics, chemistry and biology.

Therefore the ADTA is the central point of the technical and natural scientific counselling of troops and schools at the education and commitment. The scientific activity of the ADTA reach from laboratory efforts to providing technology services in all the above named departments.

The ADTA applies multidisciplinary approaches to increase the knowledge of applied research and the development of innovative technological solutions.

The military ELROB, which takes place for the sixth time now, enables you to get a glance at the latest R&D in the area of unmanned outdoor/off-road ground systems.

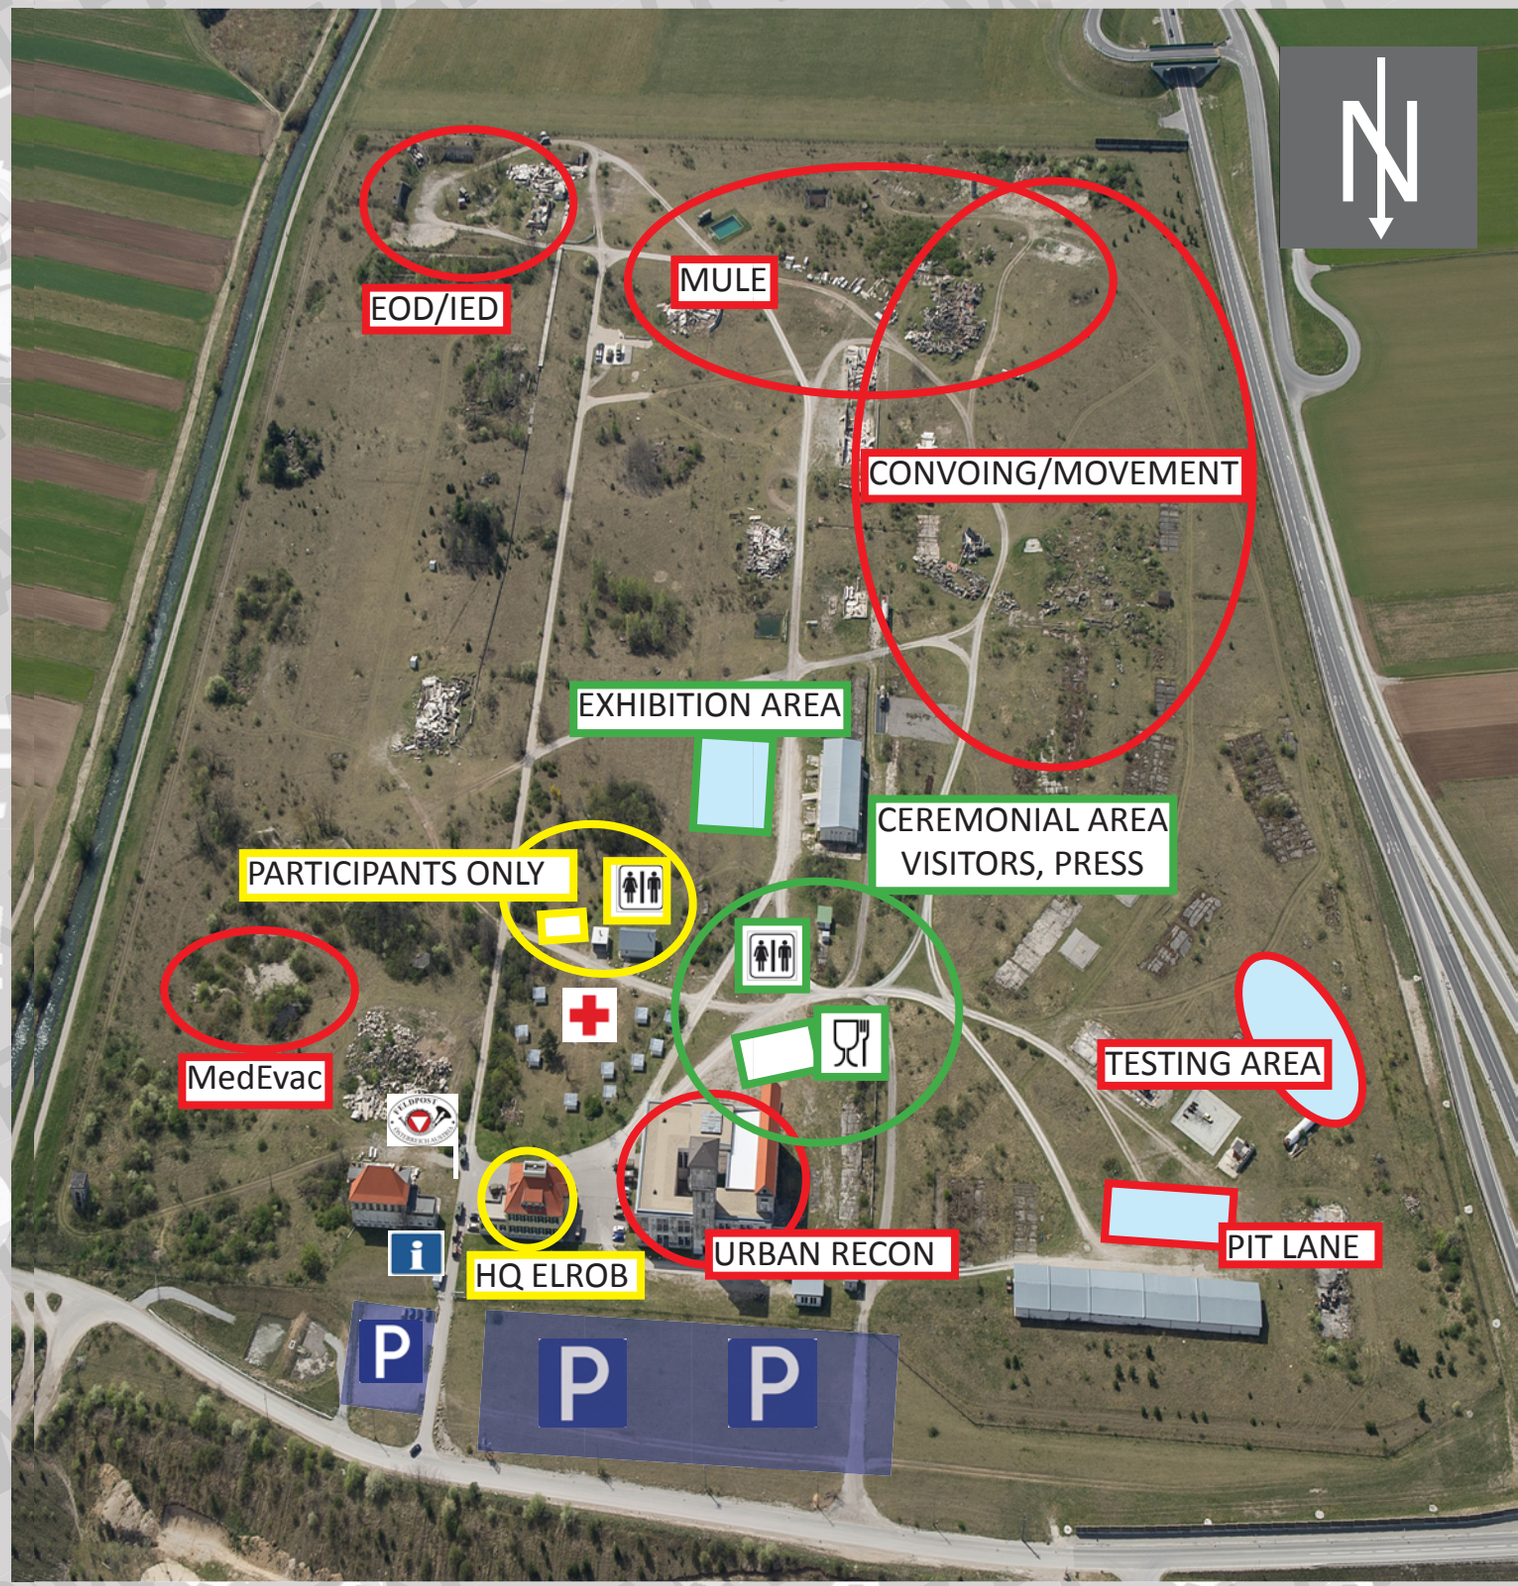
The scenarios have been developed in closest co-operation with the military users and reflect the up-to-date requirements of the forces. This event offers the fantastic opportunity to mingle with the international experts from the user community, the industry and the R&D sector.

ELROB is a strictly non-profit activity! The event is organized and carried out only by non-profit organisations. All participation fees are completely redistributed among the participants to cover travel expenses.

The event will be accompanied by a comprehensive exhibition

Scenarios:

- Convoying / Movements (transport with two vehicles)
- Reconnoitring of structures (Urban Recon) (focus on radiological and nuclear measuring and mapping)
- Mule (shuttle between two locations)
- MedEvac / Search & Rescue (SAR) (find and drag a dummy body)
- Reconnaissance and disposal of bombs and explosive devices (EOD/IED)

Notice:


- Red and yellow areas are restricted
- By visiting this event you agree the usage of your images
- Use only paved paths
- You have to obey orders given by security staff
