## Team Information

---

### The Team:

|   |
|---|
| <b>To develop machines, equipment and systems that protect or replace human beings in situations where their presence would be either impossible or place them at great risk.</b> |
|---|

This is the motto, motivation and mission of telerob Gesellschaft für Fernhantierungstechnik mbH. Whether it's one of our Master- Slave Manipulators being used to dismantle a nuclear facility or an EOD robot being used to disarm a dangerous explosive device, protecting people and their surroundings is always our paramount concern anytime one of our products is deployed.

Our engineers and specialists in the fields of electrical engineering, electronics and precision mechanical engineering combine creativity and competence in the quest for advanced solutions in the worlds of bomb disposal and remote handling technology.

The telerob range of products encompasses EOD robots ([tEODor](#) and [teleMAX](#)), completely equipped bomb disposal vehicles ([TEL600](#)), bomb disposal equipment, non-magnetic special tools ([NOMATOOLS](#)), as well as manipulators for servicing, maintaining and dismantling nuclear facilities ([EMSM](#)).

A highly qualified, highly motivated staff provides our worldwide client base not merely with innovative products developed and manufactured in accordance with the very highest standards but also with the training and instruction needed to ensure their effective use. telerob is an official NATO supplier and development partner (NATO supplier code: C 5152).

Furthermore we conform to the requirements of AQAP 2130.

### Participation:

Sponsors: none
